

...Low Freight Rates...

No matter how many plants are in your order our postal charge is the same low rate for the whole order. **Qld & NSW - \$16.00, Vic - \$19.00, S.A - \$22.00, NT& Tas \$39,WA \$49** (Includes Quarantine Inspection Costs). *Please note: **The post & packing charge is for the whole order not each plant.** Unless specified plants are sent in long pots 70mm wide. Our plants are specially treated to ensure they travel well and in remote areas are able to travel up to two weeks without ill effects. Our unique packaging method has been giving great results for 31 years. You can either plant them straight into the garden, hold them in their pots or repot them with the pots of your choice. Plants that grow in full sun have been hardened to full sun conditions. **KEY:** 1.0m Typical Height of Plant in Cultivation ie one metre, V = Vine. *Fragrant ** Native To Australia, Rf Rain-forest Plant, Ed Edible. F Frost Resistant, Fm Moderately Frost Resistant. Suited to: A Mild Climates from Hervey Bay (+Nth Qld Tablelands) South to Wollongong, Sth Aust & WA. B Inland / Hot&Dry, C Cool Areas/ Tablelands, cool parts Tas&Vic, D Tropics, E Seaside Planting-Salt Spray. If we use a small a,b,c, or d indicates not known by us but worth a try with extra care and placement. Often our customers give feedback on these. In addition every climate has different microclimates and every backyard has its own microclimates with various degrees of protection against the elements. Microclimates can be created that allow one gardener to grow plants that the neighbour can only dream about.

West Australian, Tas. & NT Orders are intended to be sent on the Following day: **Friday 22nd March.** Need your order by 4.00pm aest **Tuesday 19th March** as we go through an intricate Quarantine inspection process & need to do this in one patch to make the process feasible. Air Delivery surcharge is 10% added on to your total order. We send Toll Air. No PO Boxes

Remove any dead leaf etc on the pot surface. Do this and you will get back an improved plant.

4. You must use a very well drained potting mix. The one it came in was suitable for the conditions in the nursery it came from but may not be ideal for your conditions.
5. Fertilise with with slow release pellets and use half strength liquid fertiliser regularly in the growing season.

FOCUS ON MAIDENHAIRS

Maidenhair Ferns all belong to the

Genus Adiantum...there are about 200 species and within the species an amazing array of different cultivars.

The leaves/foilage can be layered, cut back, tasselled, variegated, lime green, dark green, light green, pink/red tipped, serrated, scalloped, large, tiny. They can be black stemmed, tall upright, tall weeping, compact weeping & compact upright.

Here's a few of the species we send:

- Adiantum tenerum - Many Cultivars
- Adiantum raddianum - Many Cultivars
- Adiantum aethiopicum - True Maidenhair
- Adiantum bessoninae
- Adiantum caudatum - Walking Maidenhair
- Adiantum formosum - Giant Native
- Adiantum fragrans
- Adiantum hispidulum - Rosy Maidenhair
- Adiantum macrophyllum - Big Leaves
- Adiantum peruvianum - Silver Dollar
- Adiantum trapeziforme - Diamond Maidenhair

Two of the species we deal with most have some of the best cultivars.

The **Adiantum raddianum** cultivars are more cold hardy than the tenerum cultivars.

The **Adiantum tenerum** cultivars require warmer conditions originating from tropical America.

The genus name ~Adiantum` comes from the Greek meaning `not wetting' referring to the ability of the leaves to shed water without getting wet!

This is the **key** to Maidenairs...**do not let them get too wet.** Yes they like some moisture but not to drown in it. That's why you will see them growing in rock crevices near waterfalls.... **Maidenhair Care:**

1. Keep foliage dryer rather than constant wet.
2. Water by lifting foliage or an under the pot water system.
3. Maids require good light but this does vary and many are happy under 70% shade.
4. Water regularly in the growing season ease off when cold.
5. If required cut back to ground zero!

....Attract Giraffe to Your Backyard....

TREE WISTERIA

(6mFmABCD) **Bolusanthus speciosus** is a sight to behold with its multitudes of hanging racemes of blue violet flowers from spring into summer..

Yes absolutely covered. This is a small tree from Southern Africa. Deciduous for a short period in early spring. Takes drought & light frost & grows well as a tub specimen. Gorgeous bonsai. Non aggressive roots. Monkeys, Giraffe & Antelope dine on the foliage! Full sun. These plants are 250mm tall plants in 70 mm pots.

....Priced at \$9.90 each (150 Parries) or 3 for \$25

CRINKLED MACGILLIVARYI TYPE (Vine*, **RfAbcD) Hoya Species macgiillivrayii Group

This is a hoyo I collected in New Guinea in recent years and have only now had enough to advertise.

As we have not flowered it yet we can't be sure of the flower but expect a big maroon type flower in clusters. We believe this hoyo to be in the Macgillivrii Group. It has quite long and thickish pointed crinkled leaves and this feature alone is very attractive. Collected on the river bank KB area near Alotau PNG...would possibly need to be kept warm in winter, above 2C has been unaffected here undershade. Easy to grow in warm conditions. Filtered light.

.....Priced at \$15.90 (450 Parries)

..Something Different..
..Something Special..

BLACKBERRY JAM FRUIT

(1.2m*FmAbcD) **Randia formosa** will give you 5cm fruit with a juicy black pulp that tastes just like blackberry jam when eaten fresh. Can be used to make jams, jellies and preserves. Big (5cm) lovely fragrant pure white star shaped flowers on and off in all the warm months. This is a small shrub with shiny dark green leaves and makes an excellent pot plant on a patio and can be used in cool areas in this way. Early & heavy producer. Native to Central America but will take a light frost. Shade or sun.

....Priced at \$12.90 (180 Parries) or 3 for \$29

ACAI BERRY

(12mEdAbcD) **Euterpe oleracea**

The black fruits are known as a super food can be eaten raw or cooked. High in antioxidants, amino acids and very nutritious as well! The juice can be extracted to make a tasty and refreshing drink. The leaves are reported to be edible as well by being cooked and having a sweet flavour. Tall slender palm growing up to or over 20 metres in its native swampy habitat. Native to Brazil, Peru & Trinidad. Needs sub tropical or warmer. Full sun.

....Priced at \$9.90 ea (180 Parries) or 3 for \$27

Heliconia Golden Torch

(1.5-2mAD) **Heliconia psittacorum x spathocircinata 'Golden Torch'**

The flowers are long lasting and excellent for cut flowers. This is an attractive dwarf clumping variety good in a tub or in the garden.

Psittacorums are luxuriant Heliconias with brightly coloured bracts. Largish tropical bright green foliage. Heliconia Golden Torch will do well in all warm coastal climates and have flowered in Perth! Semi-shade to morning sun. Great for colour, features and screening. Well drained mix and keep in a warm well lit situation....medium shade to full sun. Sent as rooted plants.

.... Priced at \$14.90 each (200 Parries)

.....**Startling Wedding Flower Variety.....**

WEDDING FLOWER - CREAM TURMERIC - Cut Flower

(70cmEdAD) **Curcuma longa syn. domestica**. This variety of Turmeric is also known as the Wedding flower as that is what it is renowned for. Gorgeous 30cm white and green bracts with startling yellow flowers emerging. This is a great cut flower. Yes it still has medicinal values but not as high a curcumin concentration as our Orange rhizomed variety. The young buds and new leaf are delicious fresh and used in cooking and you can cook fish in the older leaves. Warm conditions but a cold winter will not harm the foliage as it is deciduous. Full sun or shade.

....Priced at \$12.90 (180 Parries) or 3 for \$29

UNUSUAL PLANTS

ANTHURIUM ANOUK

(60cmABCD) This is an unusual and hard to get Anthurium, with a bright red spathe & purple spadix. The shape of the spathe & positioning of the spadix

is very pretty. Its beautiful pointed bright green foliage Readily clumps and multiplies. One of the latest hybrids direct from Holland & bred for mass flowering and cold hardiness. Filtered light.

.....Priced at \$12.90 each or 3 for \$33

....Obake Green Anthurium...

FANTASY LOVE

ANTHURIUM

(90cmAbcD) Anthurium andreanum 'Fantasy Love'. Gorgeous & very unusual Obake Anthurium that will fulfil your most

pleasant dreams with striking large (12cm) pastel green flowers with eye-catching pink.

Starts off with more pink than green and then more green than pink. This is a new release this year direct from Holland. See our notes in the newsletter. The 'flowers' are actually showy bracts & are shiny, waxy and eye-catching. Anthuriums can be grown out of direct sunlight on patios and in the garden in warm areas. Need warm humid conditions and good filtered light and can be grown indoors in winter.

....Priced at \$12.90 (200 Parries) or 3 for \$33

JADE VINE (VAbD) 1 Per Customer Strongylodon macrobotrys. Its colour

is unique in the entire world, its flowers are superb & it can be grown in warm areas, outside the tropics. Its flowers are a soft iridescent Jade blue-green and appear in summer for many months

in long hanging racemes of amazing sickle-shaped pea blossoms. This is a flower you need to see to appreciate. The Jade Vine is a strong stemmed, woody, twining creeper with dense glossy dark green leaves. From the Phillipines. Outside the tropics, you will need a warm, sunny, well drained position. Sorry customers north of Ballina, NSW Only! We will not send this plant to its death. Morning sun to full sun. Limit 1 per Customer. Sent in 100mm pots ..Priced at \$39 each

DIOON SPINULOSUM

(10mAbcD) has very attractive blue foliage with symmetrical 2m fronds. This can be the talking point of your yard.

Produces huge white wooly cones the size of watermelons!

The new fronds emerge lime green. These are long lived plants (500 years) from limestone outcrops in Mexico's rainforest and in that time will grow to 10m tall. Require very good drainage and moderate water. Full sun or part shade. These are 2 leaf plants 350mm tall in a long 100mm pot.

.....Priced at \$15.90 each

CASCADE PALM ...Indoor Beauty

(2mABcD) **Chamaedorea atrovirens**

This one is a robust and compact dwarf palm with dark dense glossy foliage.

Branches just above ground level. Red fruit. It is a native

of Mexico. Great in the garden and good indoors when kept near a window or other light source and not allowed to dry out between waterings. Sun or shade.

...Priced at \$8.90 each (150 Parries) 3 for \$23

GYMEA LILY

(4m**FABCDE) **Doryanthes excelsa** is an unusual and amazing native plant. A coastal plant from NSW, occurring from Sydney and north. The flower stem shoots for the sky and is to 4m tall with brilliant red flowers on its top - they are in large clusters to 70cm and each flower in the cluster is 10cm across and come in spring and summer. The leaves themselves are a feature growing to 1m long and are bright green, ribbed and swordshaped growing in a large rosette. This plant makes a monumental landscaping piece in the garden on a bank or in a large rockery. For all areas except the most bitterly cold Tablelands in Southern Australia. Takes frost. Full sun to light shade.Priced at \$9.90 (200Parries)

TULIPWOOD

(6m**RfABCDE) **Harpulia pendula** has

an unusual decorative orange bird attracting fruit which splits to reveal its contrasting

black seeds in winter. This is one of the neatest of native feature trees, fine examples of which can be found in both Brisbane and Sydney streets. The attractive dense canopy makes nice shade. The leaves are compound and shiny. From the dry lowland rainforests of Nthn NSW to NE QLD. and suited to coastal, inland and cooler frostfree areas. Full sun or shade.

....Priced at \$8.90 (150 Parries) or 3 for \$23

BODHI TREE

(9mAbcD) **Ficus religiosa** is the famed tree under which the Buddha sat for 6 yrs when he attained enlightenment (bodhi) at Bodh Gaya in Bihar State India. You will find it in and around every Buddhist Temple! Also known as the Bo Tree this is a magnificent signature tree that can also be kept in a pot. Very popular for Bonsai. Its heart shaped leaves have a pointed drawn out end. It must be pollinated by a special wasp. Love full sun & can be grown in the shade.

....Priced at \$14.90 each (300 Parries)

Rated Ten Times More Generous than the Credit Card Rewards Programs !

Paradise Bonus Rewards System -

Each order we send out will have a voucher with bonus points (Parries) awarded. The bonus points will be on the basis of:

10 Points (Parries) for every \$10.00 of purchases. Most plants we advertise in the main part of our catalogue will have its **Parry value to purchase** listed in brackets after the price. When you wish to use your Parries just send in your vouchers or fax or phone them. Remember the bonus point vouchers are dated and have an expiry on them and **once expired they are invalid**. The bonus points are known as 'Parries'. The Parries must accompany an order valued at \$20 or more. If the plant costs less than the Parries you hold we will send back change in Parries. Parries are not exchangeable for cash **nor deducted from an order** & are not transferable to another person. Simply choose your plant.

...Amazing Groundcover Cycad...

ZAMIA INTEGRIFOLIA

(syn.floridana) (1.5mABcD) is a very interesting little Cycad from the Southern USA and the Caribbean. Described

as a groundcover Cycad as it has much branched subterranean stems each with about 6cm across. The mature attractive fronds are 60cm to 150cm long and jump straight out of the ground forming incredible dense thickets. Coontie has attractive rusty red male and female cones both about 10cm long. Used as an outdoor ornamental in the Southern US and indoors in the colder areas. All climates except cold Tablelands. Full sun to part shade. These are fourleaf plants 200mm high in 75mm pots.

....Priced at \$9.90 each (160 Parries)

*** TAMARIND**

(20mEdAbcD) **Tamarindus indica** is one of the worlds great trees. It is a large tree with a wide dense canopy of bright-green, fine, feathery foliage... pinnate leaves. Its 3cm orange flowers produce masses of brown pods

(Tamarinds..about 15cm long) of amazingly valuable fruit which are juicy before drying. The Tamarinds have many uses as a food in flavouring and can be relished raw when ripe or baked over a fire. Its also used as a drink, a syrup and even a wine. The pulp is rich in nutrients. Medicinally Tamarind uses are uncountable and annually 90,000 kg of the shelled fruits are imported into the United States for the medical trade. The foliage is great fodder for cattle and goats. Excellent shade. Takes arid warm frostfree conditions and is economic in 500mm plus annual rainfall. One mature tree can produce 500kg of pods annually. All parts of the tree are valuable. Full sun

...Priced at \$12.90 each (200 Parries) or 3 for \$29

NEWSLETTER MARCH - APRIL 2019

Good rain has come our way and your plants are eagerly awaiting your callup.
Pleasant Plants for a pleasant life it all ties in beautifully. ..From Bob & Bev Chalmers

A Smile is the beginning of Peace. ...*Mother Teresa*

DID YOU KNOW

- * There are many hoyas in the MacgillivrayiiGroup. One in Australia is known as Big Mac. Today we introduce a new one we collected in New Guinea a few years back.
- * Grapes and raisins can be deadly to dogs
- * One of the major problems with having absolute wilderness areas is that access tracks are not allowed and any existing fire trails are closed down. So when a fire starts fire crews cannot get in to the fire and what could have been controlled turns into a dangerous conflagration burning many thousands of hectares destroying habitat and giving wildlife a very painful death.
- * The so called highest order of animal in the animal kingdom is also the most useless at looking after himself and requires the most backup support of all animals.

Busby the World Famous Planting Wonder Dog Ordains Missy the New Planting Wonder Dog

Busby has taken on the role of World Famous PlantaDog. look out for his articles and Videos and his much sought 'Paw of Approval' . Here is our new Planting Wonder Dog **Number 5 Missy.**

Busby World
Famous
Planting Wonde
Dog
Paw of Approval

New Planting Wonder Dogs. Send a photo and your name and area of abode if you are a keen Planting Dog....You also could be Ordained by Busby.

Missy is an experienced coastal half Dingo.. she specialises in Coastal Plants mainly natives ...or other plants must be useful or beautiful for her paw of Approval.

Missy .. from Marcoola Beach Qld

Busby believes we should be planting more.....more trees & more shrubs for the other animals and birds....more fruits....more veges for our food...more herbs for our health. More beauty to inspire us. More trees will catch the carbon dioxide and turn it into wood for our homes and animal homes. Get rid of the deserts by planting and improving the land. Instead of wasting money..... put it into land improvement and we will turn deserts into good land again. The climate will improve with more plants because they attract rain and breathe the oxygen back into it. The plants hold the carbon. Science has proven this years ago.

Busby says save the planet .improve the weather....plant more plants. Are you a dog on a Mission? Get yourself ordained and start getting your humans planting.

TRUE LIES ..Late one night a burglar broke into a house and while he was sneaking around he heard a voice say, "Jesús is watching you." He looked around and saw nothing. He kept on creeping and again heard, "Jesús is watching you." In a dark corner, he saw a cage with a parrot inside. The burglar asked the parrot, "Was it you who said Jesús is watching me" The parrot replied, "Yes." Relieved, the burglar asked, "What is your name?" The parrot said, "Clarence." The burglar said, "That's a stupid name for a parrot. What idiot named you Clarence?" The parrot answered, "The same idiot that named the rottweiler Jesús."

We send our plants in 70mm pots!! We do not bareroot our Plants.

Please Note; Rareplants...We send our plants in 70mm diameter pots. We do not send in 40 mm tubes.which are only 25% of the volume. Most other online sales are in either 40mm tubes or bareroot plants.We do not set plants back by taking the plant out of its pot and barerooting it.

Plants are your Key to a Pleasant Life ?

When you think about it all humans really want is a pleasant life. A pleasant life within and a pleasant life around them. That is all we require! But we get caught up in inconsequential rubbish just trying to survive.

If we feel pleasant in our bodies they call that health and if we feel very pleasant they call that pleasure.

If we feel pleasant in our minds they call that peace and if we feel very pleasant they call that joy.

If we feel pleasant in our emotions they call that love and if we feel very pleasant they call that compassion.

If we feel pleasant in our energy they call that bliss and very pleasant is called ecstasy.

A pleasant life can be achieved under any circumstances ...no need to make excuses for our upbringing...except for the acceptance of it. However it aint that easy and takes COMMITMENT every single day. It is not given from ANYONE but is managed by ourselves. if we committ to a pleasant life the human mind is capable of doing an INSTANT SWITCH in spite of the blockages that may be lurking in our subconscious from times that we dont even remember.

We all aim for the pleasant life from the people sitting in a church to the people sitting in a bar. Anyone can get it and no amount of riches helps one iota. This is the most sought after thing in life and it cannot be bought.

.....PS This is what I remember of a talk by 'Sadhguru on Youtube' without the Mountain Ash.

SO WHY ARE PLANTS YOUR KEY to the Pleasant Life we All Seek

1. For your health...you have the good fortune of good fresh nutritional food and he mend you.
2. For your pleasure you have the visual, tactile and fragrant to fill up your senses.
3. For your peace you have your own tranquil paradise gardens inside and out and the amazing forests of our land. Australia.
4. For your joy you have the tantalising beauty of the flowers and foliage and the critters that like to gather around.
5. For your love you can see creation unfold right before your eyes.
6. Feel your compassion evolve as your understanding of the life cycles matures.
7. As you relax into the slow energy waves of the plant kingdom you will see every leaf shine in your mind at once as one and this is when one you are at one with nature and you will feel your bliss.
8. Ecstasy belongs to all if we allow it by relaxing into it and dismiss the concept of time which is necessary for our body but not our mind or energy.
